

Clare Rani Augustine

Front-End Developer

Delta, BC | +1 (778) 723-3782 | clarerani92@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Front-End Developer with 8+ years of experience building scalable, high-performance web applications. Deep expertise in React, TypeScript, and modern JavaScript, with a proven record of delivering customer-facing and enterprise solutions in agile, cross-functional environments. Experienced in RESTful API integration, accessibility (WCAG), testing (Jest, React Testing Library), CI/CD workflows, and collaborating closely with backend engineers, designers, and product managers to ship reliable, user-focused products.

TECHNICAL SKILLS

Front-End	React, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Material UI, Bootstrap
State & Arch	Redux, React Query, Micro-Frontend Architecture, Component Libraries, REST APIs
Testing	Jest, React Testing Library, Cypress, TDD, Unit Testing, ESLint, Code Reviews
Performance	Performance Optimization, Lazy Loading, Code Splitting, Web Vitals, WCAG / ARIA Compliance
DevOps	CI/CD Pipelines, Jenkins, Git, Webpack, Babel, Agile / Scrum, Vercel, AWS (S3, EC2), GCP
Backend	Node.js, Express, MongoDB, MySQL, PostgreSQL
AI Tools	GitHub Copilot

PROFESSIONAL EXPERIENCE

Career Break | Delta, BC | Oct 2024 – Present

Currently on maternity leave following a company-wide layoff at Intellifi. Continuing professional development in React, testing and AI-assisted development tools.

Front-End Developer | **Intellifi** | Vancouver, BC | Oct 2023 – Oct 2024

Contributed to Orbit Genesis and Orbit Vantage, enterprise-scale commercial lending platforms processing \$100B+ in mortgages, supporting end-to-end underwriting workflows, risk monitoring, portfolio stress testing, and document lifecycle management.

Key Contributions

- Collaborated closely with backend engineers and product managers to align React front-end architecture with service design, data flow, and scalability requirements
- Participated actively in sprint planning, backlog refinement, daily stand-ups, and retrospectives, driving iterative, high-quality delivery
- Utilized AI-powered development tools (GitHub Copilot) to improve productivity, code quality, and problem-solving velocity
- Built configurable workflow interfaces for underwriting, approvals, alerts, reporting, and portfolio risk exposure monitoring
- Designed and maintained reusable component systems to ensure UI consistency and scalability across multiple modules
- Implemented Redux-based state management for large, dynamic financial datasets; optimized rendering, reducing re-renders and improving responsiveness by 30%
- Integrated REST APIs and collaborated with DevOps to streamline CI/CD deployment workflows with minimal user disruption

- Introduced structured unit testing with Jest and React Testing Library, reducing regression defects by 25%
- Participated in incident and change management, contributing to production issue resolution in high-availability environments
- Proactively communicated project status and technical risks to stakeholders and cross-functional teams

IT Analyst | Tata Consultancy Services | India

Oct 2021 – Jun 2023

Contributed to a secure, compliant digital banking solution for a major U.S. client, ensuring reliability and accessibility across platforms.

- Implemented micro-frontend architecture with React and MVC, enabling modular, scalable development for high-availability banking workflows
- Transformed high-fidelity Figma designs into dynamic, WCAG-compliant UIs; resolved accessibility and usability issues based on QA and stakeholder feedback
- Collaborated cross-functionally with backend engineers, QA, and product teams to integrate APIs and ensure smooth front-end/back-end interaction
- Led front-end code quality initiatives: code reviews, linting standards, testing coverage - reducing bugs and accelerating onboarding for new developers

Senior Software Engineer | Travancore Analytics | India

Jun 2019 – Sep 2021

- Engineered scalable front-end applications using React, Redux, Angular, and TypeScript across customer-facing and enterprise projects
- Implemented SSO and LDAP-based authentication flows for enterprise-grade access control
- Leveraged AWS S3 and Lambda for cost-effective, scalable backend integration; applied OWASP security best practices
- Debugged, optimized, and supported production applications for speed, security, and scalability

Assistant Programmer | SISL Infotech | India

Apr 2017 – Mar 2019

- Developed payment gateway integrations improving transaction success rates by 35%
- Supported feature delivery, QA testing, and deployment for eCommerce and fintech applications

Junior Developer | Xminds Infotech | India

Oct 2015 – Mar 2017

- Built server-side and client-side code for web applications using PHP, JavaScript, HTML/CSS, and MySQL (Symfony framework)

EDUCATION & CERTIFICATIONS

- **B.Tech in Computer Science Engineering** | M.G. University, India | 2010 – 2014
- Microsoft Certified: Azure Fundamentals
- Databricks Academy Accreditation: Generative AI Fundamentals
